

Protective 3-Layer Fabric Mask

Ongoing care instructions

Our protective three-layer face masks can be washed and reused. To get the longest wear out of the masks, we recommended the following care:

- Washable at 60°C
- **Do not** wash with heavy items
- Air dry the mask for best results
- **Do not** tumble dry
- Can be lightly ironed to regain shape after washing if required
- **Do not** iron on the printed parts of the mask
- Gently adjust the metal nose strip to your face. **Do not** continually bend or pinch the nose strip as it may suffer metal fatigue and break
- Your mask is like any other fabric garment, its life span very much depends on how it is cared for. Look after it and it will serve you well

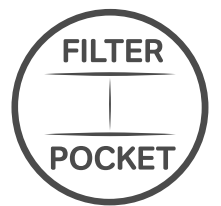

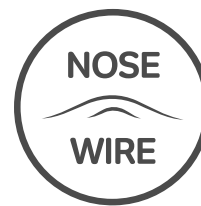

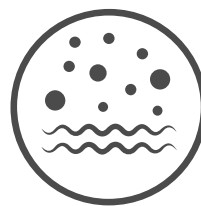

Pocket for optional PM2.5 filter

Fabric layers

Outer layer: 100% Woven cotton

Mid layer: Filtering non-woven fabric

Inner layer: Soft-feel 100% Woven Cotton

DISCLAIMER: The face mask is designed to aid defence against the spread of infection. It makes no assurances that it can prevent transmission or infection of disease or viruses. It is not a medical or clinical face mask and as such should not be used for this purpose, it should not be used under any circumstances where infection level is high and in any exposure to high level heat sources or combustible substances. Remove and do not use mask if you're suffering with breathing difficulties or skin irritation. It is recommended that you wash this product before use.
